PERMIT HOLDER RESPONSIBILITIES

Part of the building process is identifying the job location and having inspections done at specific stages of construction. Before the inspector can begin inspecting the job the following must be done by the permit holder:

- ___ 1. The lot and the building location must be staked so the inspector can verify the location of the forms and footings relative to the lot lines.
- ___ 2. The permit must be posted and visible from the road.
- ___ 3. The location must be identified by a street number or a sign indicating the owner's or contractor's name (hand painted #'s or signs are fine)

INSPECTIONS

There are a number of inspections required in each of the four codes (building, electrical, mechanical & plumbing); therefore, you must call the inspectors when you are ready for each type of inspection. Work must not proceed before the job is inspected and approved to continue. The required visual inspections are:

BUILDING:

- ___ FOOTING – between the time the forms for the footings are set and before any sills are attached. We would like to inspect prior to any concrete being poured, because if the forms are in the wrong place it is MUCH cheaper to move forms than concrete. If you do not have an approval of the forms, you pour at YOUR OWN RISK.
- ___ FOUNDATION – before back filling when the walls are complete; damp proofed or waterproofed, and the foundation drains are completely installed
- ___ ROUGH-IN – when framing is complete, BEFORE dry walling and AFTER electrical, plumbing and mechanical inspections
- ___ FINAL – when project is complete and ready for occupancy and AFTER electrical, plumbing and mechanical final

ELECTRICAL:

- ___ TEMPORARY SERVICE – when temporary service is complete and ready for hook-up
- ___ PERMANENT SERVICE – when permanent service is completed and ready for hook-up
- ___ ROUGH-IN – BEFORE insulating or dry walling, when wiring which will be hidden is complete
- ___ FINAL – when all fixtures are set, plates are on and the building is ready to be occupied
You must pay for an additional inspection on a temp. service or permanent service inspection if not getting with rough-in

MECHANICAL:

- ___ UNDERGROUND – if anything is to be covered by dirt or concrete
- ___ ROUGH-IN – anything in walls (including ducts or chimneys) BEFORE dry walling
- ___ FINAL – when furnace and/or air conditioning is completed and operating and you are ready to occupy

PLUMBING:

- ___ UNDERGROUND – when pipes are all run in ground, BEFORE you backfill or pour concrete
- ___ ROUGH-IN – when pipes are all run in wall, BEFORE dry walling, also drainage lines in ceiling of basement BEFORE covering
- ___ FINAL – when fixtures are all set and operating and you are ready to occupy

Please, remember each job is different and goes at a different pace. Therefore, we have no idea when you are ready for any inspections unless you call and let the inspectors know. Also, please make sure that you are actually ready for inspection. **If an inspection is called for and the job is not ready, a re-inspection fee will be charged.** Thank you and good luck with your project!

SPENCER TOWNSHIP

TO ALL CONTRACTORS WORKING IN SPENCER TOWNSHIP

All contractors are required to register their new license each year. This registration form should be read, signed and returned.

This contractor is aware of the following Spencer Township requirements:

1. **A copy of the contractor's license must accompany this registration & liability insurance.**
2. Only registered licensed contractors can obtain permits.
3. Permit is required prior to commencement of work.
4. Proper street address obtained from Kent County Road Commission must be on all permits and be used when requesting inspections.
5. Permit is valid only when received and accepted by inspection personnel.
6. No work shall be covered or concealed without inspection and approval.
7. Each contractor is responsible for arranging his own inspections.
8. Final inspections and Certificate of Occupancy is required for all projects before occupancy occurs.
